3. *spec.* In the Church of England: A provincial synod or assembly of the clergy, constituted by statute and called together to deliberate on ecclesiastical matters.

There is a convocation of each of the provinces, Canterbury and York. The former is the more important, and is often referred to as 'Convocation' simply; it consists of two Houses, an Upper and a Lower (on the model of the Houses of Parliament). It was convoked originally in the time of Edward I, at the same time as the lay Parliament, for the purpose of self-taxation, but it gradually assumed synodical powers. In Ireland a convocation, supposed to be the first, formed by a union of the four provincial synods, met in Dublin in 1615; after the disestablishment of the Irish Church, it was superseded by the General Synod of the Church of Ireland, composed of both clergy and laity.

In the American Episcopal Church: A voluntary organization of the clergy of a subdivision of some of the dioceses, for mutual conference, promotion of missionary work, etc., but having no legislative function. Its president is called the *Dean of Convocation*. The name is also applied to the division of the diocese in question, *e.g.* 'Convocation of East Tennessee'.

The analogue in England is a conference of the clergy of an archdeaconry or rural deanery.

Conwoy, obs. Sc. f. CONVOY.

Cony, coney (kōu·ni, kv·ni), *sb.* Pl. conies (coneys). Forms: *α.* 2 cunin, 3 konyng, 4–5 conyng(e, 5 conninge, -ynge, konyne, 5–6 cunning, cunyng, -ing; *β.* 2 cunig, 4 conig, 5 connyg; *γ.* 6–7 conie, conye, connie, -ye, conny, conney, cunnie, cunney, 6–8 cunny, 4– cony, 6– coney. [The current form represents OF. *conil, connil,* cogn. w. Pr. *conil,* Sp. *conejo,* Pg. *coelho,* It. *coniglio.* :—L. *cunīcul-us* rabbit (also burrow, underground passage, military mine), according to ancient authors a word of Spanish origin. The OF. pl. (with *l* suppressed) *coniz,* later *conis,* gave an Eng. pl. *conys, conies,* and this a singular *cony, conie.* The ME. *cunin, konyne, conyng* was a. OF. *conin, connin,* Anglo-Fr. *coning,* a parallel form to *conil,* which gave also MDu. *conijn,* Du. *konijn,* and, with *a* for *o,* LG. *kanîn,* whence mod.G. dim. *kaninchen.* In Eng. the form *cunyng, cunning* came down to the 16th c.; but from the 12th c. onward it varied also with *cunig, conig, connyg.* The historical pronunciation is with (*v*); common spellings from 16th to 18th c. were *cunnie, cunney, cunny,* and the word regularly rimed with *honey,* *money,* as indicated also by the spelling *coney*; but during the 19th c. the pronunciation with long *ō* has gradually crept in.

This pronunciation is largely due to the obsolescence of the word in general use, while it occurred in the Bible, and esp. in the Psalms, as the name of a foreign animal (sense 3); the oral tradition being broken, readers guessed at the word from the spelling. It is possible, however, that the desire to avoid certain vulgar associations with the word in the *cunny* form, may have contributed to the preference for a different pronunciation in reading the Scriptures. Walker knew only the *cunny* pronunciation; Smart (1836) says 'it is familiarly pronounced *cunny*', but *cōny* is 'proper for solemn reading'. The obsolescence of the word is also a cause of the unfixed spelling; the Bible of 1611 has *conie, cony, conies,* modern editions *coney, conies* (cf. *money, monies*), an irregularity retained in the Revision of 1885.

The rabbit is evidently of late introduction into Britain and Northern Europe: it has no native name in Celtic or Teutonic, and there is no mention of it in England before the Norman period; in the quotations the fur, perhaps imported, appears before the animal. The Welsh *cwning, cwningen,* is from ME.; the Irish *coinntu,* and Gaelic *coinean, coinein* from ME. or AFr.]

1. A rabbit: formerly the proper and ordinary name, but now superseded in general use by *rabbit,* which was originally a name for the young only. b. It is also the name in *Heraldry.* d. *dial.* In some districts applied to a young rabbit, but elsewhere more properly to an old one.

Only rarely was the true composition asserted, as in the *cony-rie, cunne-rye* of Levins. Coolie, cooly (kū·li). Forms: 6 *pl.* colles, 7 collee, (cowler), 7–8 coulee, -ie, coly, 7–9 coolee, 8 couley, 8–9 cooley, 7– coolie, cooly. [Now found (in sense 2) in the Indian vernaculars generally: Urdū قولی *qulī*, *qūlī*, Bengālī *kūlī*, Tamil, Telugu, Canarese, Malayālam, *kūli*; of disputed origin.

By some considered to be originally Tamil, and identical with the word *kūli* 'hire, payment for occasional menial work', whence (either by metonymy, or as short for *kūli-kāram* 'hire-man', *kūliyāl* 'hire-person') *kūli* 'hireling, labourer, man who does odd jobs'. The objection to this is that the first known mention of Coolies early in the 17th c. refers not to the Tamil country, in the south, but to the region of Guzerat, in the west of India. On this account there is reason to think the word identical with *Kulī* or *Koli*, the name of an aboriginal tribe of Guzerat (see sense 1), which is actually found spelt *Koulli*, *Coolie* in the middle of the 17th c.

(The Kulīs of Guzerat were well known to the Portuguese in the 16th c.; and these probably carried the name both to Southern India and to China (cf. 1745 in 2). It is probable that the similarity between *Kulī* and the Tamil word *kūli* 'hire' may have led to the use of *coolie* in Southern India in the sense of *kūli-kāram* or *kuliyāl*.)]

† 1. A variant of *Kulī* or *Kolī*, name of a numerous aboriginal tribe of Guzerat, formerly noted as robbers, but now settling down as respectable labourers and cultivators. *Obs.*

Coom, var. of COOMB 2, valley; obs. form of COME *sb.*2, radicle of barley; obs. pa. t. of COME *v.*

Coomb 1**, comb** (kūm). *dial.* Forms: see the separate senses. [The senses here included appear to belong to the same original word, though this, from want of early evidence, is not quite proved. Sense 1 is found only in OE. as *cumb*; sense 2 is found from 14th to 17th c., in form *comb*, *combe*; its pronunciation is unfortunately unknown; sense 3 begins *a* 1500, and has the forms *comb*, *combe*, *coomb*, pronounced (kūm). OE. *cumb* was prob. identical with older LG. *kumb*, HG. *kump*; cf. mod.LG. and HG. *kumm* a vessel, in various dialects, a round deep vessel, basin, cistern, trough, etc. (also mod.G. *kumme*, older prob. *kumbe*). Besides this mod.G. has *kumpf*, LG. *kump*, a vessel (in many senses), a measure of corn and fruit, ⅛ of a malter, *i. e.* an English peck nearly. The Bremen Wörterbuch identifies the two LG. forms: '*kumm* oder besser *kump*, tiefe schüssel': so that we have app. an OTeut. type **kumbo-*, **kummo-*, with by-form **kumpo-* (as in *clam*, *clamp*), with general sense of vessel, or hollowed-out receptacle.

As to the phonetic history, the vowel of OE. *cumb* was app. lengthened before *mb* as in *comb*, *climb*, *clomb*, with similar loss of *b*, and the *ū* sound preserved in modern Eng. instead of being diphthongized, as in OE. *rūm*, ME. *roum*, mod. ROOM. Cf. also COOP.]

Coomb 2**, combe, comb** (kūm). Forms: 1 cumb, (? 3 comb), 6 coome, 6– coombe, combe, 7– comb, 8– coomb, (9 coom). [In OE., *cumb* masc. 'small valley, hollow' occurs in the charters, in the descriptions of local boundaries in the south of England; also in numerous place-names which still exist, as *Batancumb* Batcombe, *Brancescumb* Branscombe, *Eastcumb* Eastcomb, *Sealtcumb* Salcombe, *Wincelcumb* Winchcombe, etc. As a separate word it is not known in ME. literature, but has survived in local use, in which it is quite common in the south of England: see sense b. In literature *coomb* appears in the second half of the 16th c., probably introduced from local use; a century later, it was still treated by Ray as a local southern word. OE. *cumb* is usually supposed to be of British origin: modern Welsh has *cwm* (kum) in the same sense, also in composition in place-names as *-cwm*, *-gwm*, and in syntactic combination as *Cwm Bochlwyd*. A large number of place-names beginning with *Cum-*, especially frequent in Cumberland, Dumfriesshire, and Strathclyde; as *Cumwhitton*, *Cumdivock*, *Cumlongan*, *Cumloden*, appear to be thus formed. Welsh *cwm* represents an earlier *cumb*, OCeltic **kumbos*.

The OE. word might however be an obvious application of *cumb*, COOMB[1], to a physical feature, though there is no trace of any such application of the cognate German words on the continent; in any case, if the Saxons and Angles found a British *cumb* applied to a hollow in the ground, its coincidence with their own word for 'basin, bowl, deep vessel' would evidently favour its acceptance and common use. This might further be strengthened, after the Norman Conquest, by the existence of a F. *combe* 'petite vallée, pli de terrain, lieu bas entouré de collines' (Littré, 12th c.), cognate with Pr., Sp. and north It. *comba*, for which also a Celtic origin has been claimed. See Diez, Thurneysen, Littré. The phonetic history is the same as in COOMB[1]; in composition (in names of old formation) -kŭm has sunk to -kəm.]

That the word is native in Scotland is doubtful: Jamieson's Dictionary knows nothing of it beyond Hogg's assertion, and it is not in common use. But in Cumberland it appears in some local names, as *Gillercombe*, the great hollow above Sour Milk Gill in Borrowdale, and as a separate word in *Glaramara Combe, Langdale Combe.*

For the history of the term see the quotations. As origin-

ally used by Owen the name contemplated the co-operation of the whole community for all economic purposes, i. e. communism. In practice, the principle has been carried out in *production*, when a body of workmen corporately own the capital by which their concern is carried on, and thus unite within themselves the interests of capital and labour, of employer and employed; and in *distribution*, when an association of purchasers contribute the capital of a store by which they are supplied with goods, and thus combine in themselves the interests of trader and customers. See CO-OPERATIVE.

(The earliest co-operative societies and stores were established as a first step towards the contemplated communistic organization of society, mentioned under CO-OPERATION. But the primary aim was gradually lost sight of, and in 1844 the principle was introduced of giving the profits not to the owners of the business, but, partly at least, to the customers.)

B. *sb.*

1. One who or that which is co-ordinate, or of the same rank; an equal; a co-ordinate element.

a 1850 Calhoun *Wks.* (1874) II. 397 The great fundamental division of the powers of the system, between this government and its independent coordinates, the separate governments of the states. 1879 Tourgee *Fool's Err.* xlv. 343 Can the African slave .. develop into the self-governing citizen, the co-ordinate of his white brother in power.

2. *Math.* Each of a system of two or more magnitudes used to define the position of a point, line, or plane, by reference to a fixed system of lines, points, etc. (Usually in *pl.*)

In the original (and most often used) system, invented by Descartes, and hence known as that of *Cartesian co-ordinates*, the co-ordinates of a point (in a plane) are its distances from two fixed intersecting straight lines (the *axes of co-ordinates*), the distance from each axis being measured in a direction parallel to the other axis. (The determination of the position of a place by *latitude* and *longitude* is a similar case.) The co-ordinates are *rectangular* when the axes are at right angles; otherwise *oblique*. The name *Cartesian co-ordinates* is also extended to the case of points *in space* (not in a particular plane) referred to *three* axes not in one plane intersecting in a point (like three edges of a box meeting at one corner).

Hence applied to various other systems, mostly named from the nature of the fixed figure, etc., to which the points are referred; as *Bipunctual co-ordinates*, co-ordinates defining a line or point by reference to two fixed points and a fixed direction. *Polar co-ordinates*, co-ordinates defining a point (in a plane) by reference to a fixed line (*initial line* or *axis*) and a fixed point (*origin* or *pole*) in that line; the co-ordinates of any point being the length of the straight line (*radius vector*) drawn to it from the pole, and the angle which this line makes with the axis (as in defining the position of a place by its *distance* and *bearing* from a given place). The name *polar co-ordinates* is also applied to an extension of this system to points in space. So *bicircular co-ordinates*, *bilinear c.*, *trilinear c.*, etc.

1823 Crabb *Technol. Dict.*, *Co-ordinates* (Geom.), a term applied to the absciss and ordinates when taken in connexion. 1865 Tylor *Early Hist. Man.* iv. 60 He can in thought shift his centre of co-ordinates and the position of his axes. 1879 Thomson & Tait *Nat. The long *o* of ME. *cōte*, evidenced also by the Du. form, which implies MDu. **cōte, coete*, makes impossible the conjecture that the word is connected with Welsh *cwt* short, which is on other grounds inadmissible. Prof. Newton thinks that there is a connexion between *coot* and *scoot* or *scout*, another name of the guillemot, and allied sea-fowl; but the early history of the latter is obscure.]

1. A name originally given vaguely or generically to various swimming and diving birds. In many cases it seems to have been applied to the Guillemot (*Uria troile*), the Zee-koet or Sea-coot of the Dutch.

2. Afterwards restricted in literary use to the Bald Coot (*Fulica atra*, fam. *Rallidæ*), *Meer-koet* of the Dutch, a web-footed bird inhabiting the margins of lakes and still rivers, having the base of the bill extended so as to form a broad white plate on the forehead (whence the epithet *bald*); in U.S. applied to the allied *F. Usually spelt *cooper* in the newspapers 1881–84, but pronounced *coper* by the fishermen, and so spelt in the publications of the Mission to Deep Sea Fishermen. In the memory of old smacksmen of Grimsby (as stated by Mr. J. F. Wintringham) the name goes back to 1854, when Flemish and Dutch *koopers* first began to frequent the fleets.]

A vessel fitted out to supply ardent spirits, etc. usually in exchange for fish, to the deep-sea fishers in the North Sea; a floating grog-shop.

The practice began in a comparatively innocent barter trade carried on by Dutch boats visiting the fishing fleets, when the latter fished in close to the land, off Camperdown and the Texel; but it led to the fitting out of 'floating grog-shops' to attend each fleet. Public attention was called to the demoralizing nature of the traffic in 1881, and it formed the subject of a convention between the British, German

and Dutch governments in 1882, for the carrying out of which an Act of Parliament was passed in 1888.

Copper (kɒ·pəɹ), *v.* [f. COPPER *sb.*1]

1. *trans.* To cover with copper; to sheathe the bottom and sides of a ship with copper.

1530 PALSGR. 498/2, I copper. 1781 *Westm. Mag.* IX. 325 A very large frigate..the only one the Spaniards have coppered. 1809 *Med. Jrnl.* XXI. 174 Coppering her bottom. 1862 *Macm. Mag.* June, 167 A bronze statue and a cast-iron one coppered by electricity.

2. **In the game of faro**: To lay a copper coin or other token upon (a card) to indicate that the player bets against that card; to bet against. (U. S.)

1892 *Correspt. in Cincinnati*, If he bet the card to lose, he put an old-fashioned copper cent on the top of the silver or gold; in other words he 'coppered' it. To 'copper' a thing, therefore, is to bet or estimate that it will lose: you 'copper' a horse in a race.

Hence Co·ppering *vbl. sb.* and *ppl. a.*; also as *sb.* the copper sheathing of a ship's bottom.

Copperas (kɒ·pərăs). Forms: 5–7 coperose, (5 coperosse, coporose, copros(se, 6 coperus, cop(p)erous(e, coporouse, (copper(r)oost(e), copporose), 6–7 coperas, cop(p)eress(e, -is, -ose, cop(p)oras, -es, -is, cop(p)ras, -es(se, 7 cop(p)erase, -ass, -ice, cop(p)ris, -ice, -ose, 6– copperas. [In 15th c. *coperose*: cf. F. *couperose* (14th c. in Littré), *coupperose*, It. *copparosa*, med.L. *cuperosa, cuprosa, coporosa*, in various early glossaries: see *esp.* Grimm, s. v. *Kupferrose.*

Diez explained *cuperosa*, as = **cupri rosa* rose of copper, comparing the Gr. name χάλκανθον, -os lit. 'flower of copper.' It seems more probable that med.L. *cuprosa, cuperosa* was simply short for **aqua cuprosa* = Ger. *kupferwasser*, Du. *koperwater*, and its association with *rosa* 'rose' merely an etymological fancy. That it was so understood is certain: cf. Kilian (Flemish 1599) '*Koper-roose, Koperwater*, chalcantum, vitriolum, *vulgo cuperosa* and *coppa rosa*'; and obs. Ger. *kupferrose* = *kupferwasser* (Henisch); also mod. Du. *koperrood* copper-red, obs. Ger. *kupferroth*, LG. *koperrôt*. See the many forms in German under *kupferrauch, -rose, -roth, -rusz, -wasser*, in Grimm. In F., *couperose* is also applied with more descriptive propriety to the disease *copper nose*; so in Ger. 'eine kupferrote nase' (Grimm).]

1. A name given from early times to the proto-sulphates of copper, iron, and zinc (distinguished as *blue, green*, and *white* copperas respectively); etymologically it belonged properly to the copper salt; but in English use, when undistinguished by attribute or context, it has always been most commonly, and is now exclusively, applied to *green* copperas, the proto-sulphate of iron or ferrous sulphate ($FeSO_4$), also called *green vitriol*; used in dyeing, tanning, and making ink.

(The extension of the name beyond its etymological meaning is anterior to its appearance in English, and indeed inherited from Gr. χάλκανθον, the description of which by Dioscorides gives prominence to *blue* vitriol, while its use as shoemaker's ink implies *green* vitriol; the same is true of Pliny's account of *chalcanthum*. It is probable that, at all times, the occurrence of composite salts containing a variable proportion of copper and iron, as well as the failure to distinguish between copper and iron pyrites, contributed to the confusion. It has to be remembered also that from the mediæval point of view 'copperas' was a *species*, occurring in various colours, the difference of composition being only vaguely apprehended, and that the phenomenon of the dissolving of iron by a solution of green copperas, with deposition of its copper, was explained as conversion of iron into copper by the mediation of the 'copperas', which changed its colour from blue to green in the process.)

Cor- 2, **coro-**, (**core-**). Gr. *κόρη* girl, doll, pupil of the eye (cf. BABY), has been taken as the basis of modern surgical terms relating to the pupil. The combining form of the Gr. word (as in other words in *-η*, *-α*) is *κορο-*, *coro-*, before vowels *cor-*; but *core-* representing the Gk. nom. case has by some been erroneously taken as the formative, giving the barbarous forms *corelysis*, *coremorphosis*, and the illiterate *coreometer*, *coretodialysis*, etc. Few of these combinations are English in form: the chief being **Core·ctomy**, **Coro·tomy** (core-), excision and incision of the pupil, **Co·roplasty** (core-), an operation for forming an artificial pupil; **Core·ctome**, an instrument used in cutting through the iris; **Coropla·stic** (core-) *a.*, relating to coroplasty.

1. A hard calcareous substance consisting of the continuous skeleton secreted by many tribes of marine cœlenterate polyps for their support and habitation. Found, according to the habits of the species, in single specimens growing plant-like on the sea-bottom; or in extensive accumulations, sometimes many miles in extent, called *coral-reefs*.

a. Historically, and in earlier literature and folk-lore, the name belongs to the beautiful *Red Coral*, an arborescent species, found in the Red Sea and Mediterranean, prized from times of antiquity for ornamental purposes, and often classed among precious stones. *Pink coral*: a pale variety of this.

b. Afterwards extended to other kinds; at first named from their colour, as **White coral**, originally applied to Madrepore, **Black coral** (*Antipathes*), **Blue coral** (*Heliospora*), **Yellow coral**, etc. In more recent times, many kinds have been named from the appearance of the aggregate skeleton, as **Brain c.** (*Meandrina*), **Cup c.** (family *Cyathophyllidæ*), **Mushroom c.** (*Fungia*), **Organ-pipe c.** (*Tubipora*), **Star c.** (*Astroides*), etc. See also MADREPORE, MILLEPORE.

2. (with *a* and *pl.*) a. A particular species of the preceding, or of the colonial zoophyte of which it is the skeleton; also, a single polypary or polypidom in its natural condition (= CORALLUM).

The coralligenous zoophytes belong to the two classes *Anthozoa* (or *Actinozoa*) and *Hydrozoa* of the CŒLENTERATA (q.v.). Both these classes contain families of compound, aggregate, or colonial zoophytes, secreting a continuous calcareous skeleton, which goes on growing by the constant development of new polyps or individual animals, each, like the bud of a plant, springing from and connected with the common stock. The Anthozoa are usually subdivided into two sub-classes, *Alcyonaria* (= *Octactinix*), to the colonial families of which belong the Red, Blue, and Organ-pipe corals; and *Zoantharia* (= *Hexacoralla*), of which the division *Antipatharia* contains Black coral, and *Madreporaria* the Madrepores, Brain-corals, Mushroom-corals, Star-corals, etc., the chief reef-building corals. To the class *Hydrozoa* belong the *Millepores*, which are only distantly related to the other coralligenous animals, though their calcareous skeletons also form extensive reefs.

Prob. first given to the calcareous sea-weed *Corallina officinalis* (sense 1 below); but also including the compound animal organisms of plant-like habit growing in the sea, then thought to be plants. When the animal nature of coral was recognized, the corallines (including *Corallina*) were transferred to the animal kingdom. More accurate knowledge has since separated senses 1 and 2. The animal 'corallines' have moreover been found to belong to entirely distinct zoological divisions, some of them (*Polyzoa*) being Cœlomata, others (*Hydrozoa*) being Cœlenterata; hence the name is no longer a term of Zoology, though retained in popular use, as in 'a collection of sea-weeds and corallines'.

2. *Arch.* A projection of stone, brick, timber, iron, or other constructional material, jutting out from (not merely attached to) the face of a wall, to support a superincumbent weight.

As defined by the French architects, a corbel has parallel sides perpendicular to the surface of the wall, and must project farther than its own height. (Cf. CONSOLE.).

Some English writers use the term more loosely, so as to include e. g. the tapering projection sustaining the ribs of a vault called by the French *culot* or *cul de lampe*, and specially excluded by Viollet-le-Duc and Bosc from their definition of *corbeau*.

In English, the term appears to have been purely technical, until caught up by Sir Walter Scott; his 'corbels carved grotesque and grim' have taken hold of the popular fancy, and associated the word with the notion of grotesque ornamentation; but a corbel is not an ornament, nor does ornamentation enter into its essential character.

These names have app. no literary history, and are evidently popular designations, meaning steps such as only a perching or climbing animal, like a crow or cat, could get at or use. Jamieson, however, offered the conjecture that *corbie-steps* might be a corruption of 'corbel-steps' (of the existence of which he had no evidence whatever), and this merely fictitious form has been adopted in some Dictionaries, etc.]

Core (kōəɹ), *sb.*¹ Forms: 4– core; also 4–5 coore, 5–7 coare, (7 chore, choare, kore, quore), 7–8 coar. [Appears *c* 1400, in senses 1, 2; *core* has been the prevailing spelling from the first. Etymology uncertain.

Minsheu conjectured 'perhaps it hath its name from L. *cor* the heart, because it lieth in the middle of the fruit'. Skinner pronounced it 'from F. *cœur*, It. *cuore*, L. *cor*', which has been repeated by most etymologists since. But the original meaning does not agree with any sense of the L. *cor* or Fr. *cœur*, and it was not app. till late in the 16th c. that any one thought of associating it with the notion of 'heart'. Moreover the OF. word was *cuer*, which in the end of 14th c. gave place to *cueur*, latinized after the Renascence to *coeur, cœur*. Other conjectures are that it represents F. *corps* (OF. also *cors*) body, or *cor* horn. Some support is given to the last by sense 3 (see esp. quot. 1580); but the persistent final *e* of the Eng. word is a great obstacle to any such derivation. The primary sense of *core* had formerly been expressed by COLK.]

A. *sb.* A joint rival with others; one of two or more rivals ranked as equals.

Latham says '*Corival*, though used as synonymous with *rival* or *corrival*, is a different word. Two persons or more rivaling another are the only true *co*rivals'. But this does not seem to be historically correct.

Cork (kǭk), *sb.*[1] [Cf. Sp. *corcha, corche* in same sense; but 15th c. *corke*, with 16th c. Du. *kork, kurk*, Ger. *kork*, appears to represent OSp. *alcorque* 'a corke shooe, a pantofle' (Minsheu), in which sense *corke* is cited in 1463 (sense 2); cf. also Ger. *korke* slipper (1595 in Grimm), and the earliest High G. name for cork, *pantoffel-* or *pantoffelholz* slipper-wood.

The Sp. *corche* represents (directly or indirectly) L. *corticem* bark (in which sense Sp. now uses *corteza*:—L. *corticea*). *Alcorque*, known in Sp. of date 1458, was immediately from Sp. Arabic (Covarrubias 1611 has 'dicho en Arabigo *corque*'); but its origin is uncertain; Dozy thinks it represents L. *quercus*. If this be so, then *corque*, and by implication *cork*, has no connexion with Sp. *corcha, corche*, or L. *cortex*.]

3. *collective sing.* The seed of the cereal or farinaceous plants as a produce of agriculture; grain.

As a general term the word includes all the cereals, wheat, rye, barley, oats, maize, rice, etc., and, with qualification (as *black corn*, *pulse corn*), is extended to leguminous plants, as pease, beans, etc., cultivated for food. Locally, the word, when not otherwise qualified, is often understood to denote that kind of cereal which is the leading crop of the district; hence in the greater part of England 'corn' is=*wheat*, in North Britain and Ireland=*oats*; in the U. S. the word, as short for *Indian corn*, is restricted to *maize* (see 5).

Wheat, rye, barley, oats, etc. are in U. S. called collectively *grain*. *Corn* in combinations, in American usage, must therefore be understood to mean *maize*, whereas in English usage it may mean any cereal; e. g. a *cornfield* in England is a field of any cereal that is grown in the country, in U. S. one of maize.

¶ The following erroneous explanation given by Littleton, as an 'it is said', has been repeated in the Law-books and Dictionaries down to the present time. It was perhaps founded on the passage from Bracton given above, in which there is mention both of a tenure by serjeanty, and of 'cornage' or horngeld.

Cornice (kɔ̄ɹnis), *sb.* Forms: 6- cornice, 7 cornishe, corniche (coronix), 6-8 coronice, 6 coronich, (cornix), 6-9 cornish. [The forms *cornice*, *cornishe*, were taken immed. from F. and It. equivalents: cf. 16th c. F. *cornice*, *cornise*, in Cotgr. *cornice, corniche* 'the cornish or brow of a piller or wall', mod.F. *corniche*; ad. It. *cornice* (kornī·tʃe) 'the ledge whereon they hang tapistrie in any roome; also an out-jetting peece or part of a house or wall' (Florio); *cornice* represents the It. spelling; F. *corniche*, Eng. *cornish* derive from It. pronunciation. The variants *coronix*, *coronice*, are based on 16–17th c. latinized forms.

It. *cornice*, the source of the word in all the mod. langs., is known from the beginning of Italian literature, being frequent in Dante. In form it is identical with *cornice*:—L. *cornix*, *-īcem* crow (*Corvus Cornix*), and by Florio it is treated as the same word; in the *Vocabolario della Crusca* the two are separated. The L. term for the architectural cornice was *corōna* (Vitruvius), and some have conjectured that the It. *cornice* is in some way derived or corrupted from that word, the form *coronix* cited by Du Cange, and used in Eng. by Shute in 1563, being assumed to be a connecting link. But there is no evidence for L. *coronix* before 16th c. Du Cange's example is of 1643, his example of *cornix* of 1605; both appear to be merely latinized forms of the Italian word, *coronix* being contaminated by the desire to connect it with *corōna*. Another suggestion is that the It. *cornice* was in some way related to L. *corōnis*, *-idem* = Gk. κορωνίς, given in Hesychius in the sense τὸ τελευταῖον τῆς οἰκοδομῆς ἐπίθεμα 'the finishing piece placed on the building', the 'cope-stone'. But this could not have phonetically given It. *cornice*, unless indeed the Gk. word had passed into popular Italian use, and been assimilated by popular perversion to *cornice* crow. Of this we have no evidence.]

Corpse (kɔ̄ɹps, kɔ̄ɹs), *sb.* Formerly 4–8 corps; also 6–7 corpes, *Sc.* corpis. [ME. *corps*, orig. merely a variant spelling of the earlier ME. *cors* (see CORSE), a. OF. (11–14th c.) *cors* = Pr. *cors*:—L. *corpus* body. In the 14th c. the spelling of OF. *cors* was perverted after L. to *corps*, and this fashion came also into Eng., where *corps* is found side by side with *cors*, and became gradually (by 1500) the prevalent, and at length the ordinary form, while at the same time *cors*, from 16th c. spelt CORSE (q. v.), has never become obsolete. In Fr. the *p* is a mere bad spelling, which has never affected the pronunciation. In Eng. also, at first, the *p* was mute, *corps* being only a fancy spelling of *cors*; but app. by the end of the 15th c. (in some parts of the country, or with some speakers) the *p* began to be pronounced, and this became at length the ordinary practice; though even at the present day some who write *corpse* pronounce *corse*, at least in reading. The spelling with final *e*, *corpse* (perhaps taken from the modern pl. *corpses*) was only a rare and casual variation before the 19th c., in which it has become the accepted form in the surviving sense 2, which is thus differentiated from CORPS, used with French pronunciation in the military sense. In Fr. *cors, corps* the pl. is the same as the sing.; in Eng. also the ordinary plural down to 1750 was *corps*, though *corpses* is occasional from 16th c. In the 17th c. *corps* meaning a single dead body was often construed as a plural = 'remains', as is still the case dialectally; in Sc., *corps* pl. gave rise to a truncated singular *corp* before 1500.

Comparing the history of F. *cors, corps*, and that of Eng. *cors, corps, corpse*, we see that while modF. (kōr) has in pronunciation lost the final *s*, Eng. has not only retained it, but pronounces the *p*, and adds a final *e* mute, which is neither etymological nor phonetic, but serves to distinguish the word from the special sense spelt *corps* and pronounced (kōəɹ).]

In sense it is identical with Coss *v.*, being the usual English form while *coss* is mostly Sc.; this, with the fact that both *coss* and *corse* certainly go back to an early date, makes it almost impossible to consider them as mere phonetic variants arising from the vocalization of *r* in *corse*, or the insertion of *r* into the spelling of *coss*. It is, however, in favour of their identity that there is a third verb, SCORSE, variously written *skoase, skoce, scoarse, scource*, synonymous in meaning with *corse* and *coss*; and that It. has both *cozzonare* and *scozzonare* 'to coarce or trucke horses with a horse-coarcer' (Florio).]

SMITH *Herringbusse Trade* 7 The Corved Herrings, which are to make red Herrings, are those that are taken in the Yarmouth seas, provided that they can bee carried on shore within 2 or 3 dayes after they be taken, otherwise they must be pickled. The Corved Herrings are never gipped but rowed in salt, for the better preservation of them, till they can be brought a shore, and if any be preserved for to make Red-herrings, they are washed out of the pickle before they be hanged up in the Red-herring houses. 1641 — *True Narr. ☞ In the *Dict. Rusticum* 1704, the quot. from S. Smith is given, s. v. *Herring-fishery*, with 'corved' misprinted 'corred'; whence ASH 1775 has the spurious '*Cored* (in the herring fishery) rolled in salt, prepared for drying', which has been mechanically repeated in many subsequent Dictionaries: some of the most recent invent a fictitious vb. trans. '*Core*, to roll herrings in salt and prepare them for drying'.

Cosset (kɒ·sĕt), *sb.* Also 8 cossart. [Not found before the 16th c.: derivation uncertain.

Prof. Skeat (*Trans. Philol. Soc.* 1889) has suggested that it is the same word as OE. *cot-sæta* cot-sitter, dweller in a cot, cottar; cf. the Domesday forms, pl. *coscez, cozets, cozez* (*z*=*ts*). This is phonetically satisfactory, and the sense of 'lamb dwelling in a cot' or 'kept by a *cot-sæta* or cottar' finds support in It. *casiccio* a tame lamb bred by hand, f. *casa* house; Ger. *hauslamm* house-lamb and 'pet', is analogous. Cf. also '*Cotts*, lambs brought up by hand, cades', Marshall *Rural Econ. E. Norfolk*, 1787 (whence in Grose 1790). There is however a long gap between the *coscez* of Domesday and the *cosset* of 1579, during which no trace of the word in either sense has been found.]

Cost, obs. f. COAST, side, rib, border, region, etc.

Cost (kɒst), *v.* Also 4–6 coste. Pa. t. and pple. cost; also in 4 pa. t. costed, costide, pa. pple. coste. [a. OF. *coster, couster* (mod. *coûter*) = Pr. and Sp. *costar*, Pg. *custar*, It. *costare*:–L. *constāre* to stand together, stand firm, abide, be settled or fixed, stand at a price, cost, f. *con-* together + *stāre* to stand.

The construction of this verb is idiomatic, and for its analysis it is necessary to go back to Latin. *Hoc constitit mihi tribus assibus* was literally 'this stood (to) me in three *asses*'. The dative of the person has in Eng. become an indirect object, *to* being never expressed; the Lat. locative (ablative or genitive) of the amount or price became a simple object in French, and remains an adverbial object in English, *in* being never expressed. Hence a natural tendency to view the noun ex-

pressing the price as a simple object, and the verb as transitive. That it is yet really intransitive is shown by the fact that it has no passive either with the price or the indirect object as subject; 'this cost me nothing' cannot be changed into 'nothing was cost me by this,' or 'I was cost nothing by this'. The adverbial adjunct may also be expressed by an adverb as *much, little, more, less, dear(ly* (cf. L. *carius constat*): even here the tendency is to look upon *much, little,* etc. as adjs. used substantively.]

1. To be acquired or acquirable at (so much), to come into one's possession or be maintained at (an expressed price); to be of the price of, be bought or maintained for, necessitate the expenditure of (an amount specified, or indicated as *much, little,* etc.).

1. A kind of apple of large size.

Often mentioned from 14th to 17th c., after which the word passes out of common use, though still retained by fruit-growers in the name of one or more varieties of apple identical with or derived from the original Costard. The latter is described by R. Hogg, *British Pomology* 1853, as a large apple, distinctly five-sided, having five prominent ribs extending into the basin of the eye, and forming ridges round the crown. A Kentish grower who has *Martin's Costard*, describes it in May 1892, as 'a very large apple, shape oval, very much ribbed, a strong grower, bearing every other year.'

Cost-book 'kɒ'st,buk,. *Mining.* [f. COST *sb.*^{2} + BOOK.] A book containing an abstract of all costs and expenses incurred in working a mine, and of all returns from sales, etc., with a balance of profit or loss.

By the Stannaries Act, the Cost-book must be made up and laid before the Shareholders at least once in every 16 weeks, and the term 'cost-book' is defined to include all the subsidiary books kept in the mine. Hence *Cost-book Company*, a kind of partnership formed to work a *Cost-book Mine* on the *Cost-book System*, according to which any partner is at liberty to withdraw after such periodical settlement of accounts, without further liability.

Cottage (kɒ·tėdʒ). Forms: 4–6 cotage, 5– cottage. [app. a. AF. **cotage*, in latinized form *cotagium*, f. *cota* COTE1, COT.1. The force of the suffix was prob. to denote a cot and its appurten-

ances, a cottage tenement; but no distinct evidence of this is quoted. Mod.F. *cottage* is from Eng. OF. had *cotage* as a term of feudal law in the sense of base tenure (*tenure roturière*, Godef.), and the rent paid for a tenement so held. Cf. the following:

Ashmole MS. 837 (17th c.) art. viii. fol. 162 An Esquire.. is he that in times past was Costrell to a knight .. whereof euery knight had twoe at the least [in] attendance upon him, in respect of the fee, For they held their land of the knight by Cottage, as the knight held his of the king by knight service.]

1. A dwelling-house of small size and humble character, such as is occupied by farm-labourers, villagers, miners, etc.

Historically the term is found first applied to the dwelling-places or holdings which under the feudal system were occupied by the cottars, cottiers, cotsets, or coterells, and by the labourers of a farmstead; dwellings for the labouring classes in rural and urban districts were, under this name, the subject of various legal enactments, such as 31 *Eliz.* c. 7, 15 *Geo. III*, c. 32, etc., and, when under a certain rental, were exempted from paying church-rate, poor-rate, etc.; with the disappearance of legal regulations and exemptions, and under the influence of 4, the term has become more vague in its application.

4. 'The term cottage has for some time past been in vogue as a particular designation for small country residences and detached suburban houses, adapted to a moderate scale of living, yet with all due attention to comfort and refinement. While, in this sense of it, the name is divested of all associations with poverty, it is convenient, inasmuch as it frees from all pretension and parade and restraint' (*Penny Cycl.* Supp. (1845) I. 426). Cottar, cotter (kɒ·təɹ). [Partly ad. med.L. *cotārius*, f. *cota* cot; partly a later formation from Cot *sb.*1 + -ar 3, -er 1.]

1. Sometimes used to translate med.L. *cotārius*, applied in Domesday Book to a villein who occupied a cot or cottage with an attached piece of land (usually 5 acres) held by service of labour (with or without payment in produce or money).

Cotarius probably represented the OE. *cotsæta* or *cotset*, *cotsetla*, and *cotman*, or at least, with the *bordarius*, included these. The distinction between the *cotarius* and the *bordarius*, *bordar*, or *bordman*, has not been satisfactorily determined; when both are mentioned together the *bordarii* are usually named before the *cotarii*, and the latter are much less numerous. In some cases, also, Domesday seems to distinguish *coscez* and *cotarii*: thus under the manor of Haseberie, Wiltshire, there are 'xiii coscez, and ii cotar'.' In Ellis's Abstract of Population in Domesday (II. 435–6), Devonshire has *bordarii* 4847 .. *coscez* 70, *cotarii* 19..*servi* 3294, *villani* 8070.

[In Branch I, repr. OF. *cuncile*, ONF. *concilie*, = L. *concilium* (f. *con-* together + *cal-* to call) a convocation, assembly, meeting, union, connexion, close conjunction; sometimes an assembly for consultation, in which sense it became confused with *consilium* an advisory body (though the confusion was perh. in most cases due to later scribes of MSS.). In mediæval times *concilium* was mainly appropriated to the assemblies convoked to settle points of doctrine and discipline in the Church, or the relations between Church and State in particular countries, — the *Councils*. An early L.-Gr. Gloss. in Du Cange has *Concilium, συνέδριον, συμβούλιον, σύνοδος*; and an ancient Codex of the Canons quoted by him has 'Synodum autem ex Græco interpretari Comitatum, vel Cœtum; Concilii autem nomen tractum ex more Romano'. In OF. *consilium* came down as a living word in the form *conseil*, while *concile* (*concire*) was used for the ecclesiastical *concilium*, which sense it still exclusively retains. In English, the two words were, from the beginning, completely confused: *conseil* was frequently spelt *conceil*; *concile* was spelt *consile* and *conceil*; and the two words were treated as one, under a variety of forms, of which *counseil*, later *counsel*, was the central type. In the 16th c. differentiation again began: *councel*, later *council*, was established for the ecclesiastical *concilium*, F. *concile*; and this spelling has been extended to all cases in which the word means a deliberative assembly or advisory body (where L. has *consilium*, Fr. *conseil*), leaving *counsel* to the action of coun-

selling and kindred senses. The practical distinction thus established between *council* and *counsel* does not correspond to Latin or French usage.]

* **I.** Uses derived from L. *concilium*.

2. *spec.* An assembly of ecclesiastics (with or without laymen) convened for the regulation of doctrine or discipline in the church, or, in earlier times, of settling points in dispute between the ecclesiastical and civil powers. [The only sense of F. *concile*.]

Variously qualified according to its sphere, as *œcumenical, general, national, patriarchal, primatial, provincial, diocesan* (this=synod). Without qualification, usually applied to *general councils*, i.e. those called together by an invitation to the church at large, and claiming to speak in the name of the whole church, whether ultimately accepted as doing so (*œcumenical*) or not. In early times *general council* was used less definitely, e.g. for a national or provincial council. In the Middle Ages there were also *mixed councils*, which met to settle both spiritual and civil affairs.

3. In the New Testament, regularly used to render Gr. *συνέδριον*, Vulg. *concilium*, chiefly in reference to the Jewish Sanhedrim, or a meeting of that body.

[In the MSS. and printed texts of the Vulgate, *concilium* and *consilium* are often confused; in Acts xxv. 12 the Clementine text has *concilio*, followed by the English versions, including 1611 and 1881, with *council*; but the oldest MSS. have *consilio*, the proper rendering of *συμβουλίου*. The Anglo-Saxon Gospels usually represent *concilium* by *gemót*, but they, as well as the versions of the Psalter, have sometimes *ȝepeaht*, 'counsel, advice', implying that the translator had *consilium* before him in the Latin, e.g. in Mark xiv. 55 (where *consilium* is actually the reading of important MSS. written in Ireland and England). In Matt. xii. 14, *συμβούλιον ἔλαβον*, is rendered in the Vulgate *consilium faciebant*, for which Tindale, Cranmer, and version of 1611 have 'helde a counsell'; current editions of 1611 have 'held a council', 1881, correctly, 'took counsel'.]

b. *Great Council* (in *Eng. Hist.*): sometimes applied to a *Witena gemót* or assembly of the *witan*, under the Anglo-Saxon kings; more frequently to the assemblies under the Norman kings of tenants-in-chief and great ecclesiastics, out of which the House of Lords originated, and to occasional general assemblies of the barons or peers in later times. Also used of similar national assemblies of other countries, as the Cortes of Spain or Portugal.

The last *Great Council* in England was that summoned by Charles I at York in 1640, after the practice had been long disused. The name, though proper to the assembly, is sometimes given to its constituents as a permanent body: cf. sense 6. So *General* or *National Council*.

In 1532, the functions of the latter body, together with those of the 'Session of James I' (Act 1425, c. 65), and the judicial functions of the Lords Auditors of Parliament (instituted 1368–9) were combined in the *College of Justice*, also called *Court of Session*, then created. Hence the judges of the court are styled *Lords of Council and Session*, and its records the *Books of Council and Session*.

1. A title of nobility in some European countries, corresponding to the English title EARL (by which in earlier times it was always translated).

It is now used to render not only the various cognate Romanic words, but also the German *graf* and its cognates in Du., Da., Sw., etc.

In reference to Roman History, it translates L. *comes*, as in *Count of Britain* (*Comes Britanniæ*) and *Count of the Saxon Shore* (*Comes Littoris Saxonici*), two of the generals of the Roman province of Britannia in the 4th century.

Counter-, *prefix*:—ME. and AF. *countre-*, a. F. *contre-* (= Pr. It. *contra-*):—L. *contrā* adv. and prefix (see CONTRA-) against, in return. The form in which the Lat. prefix has come down through Fr. into Eng. Used in words actually adopted from earlier F., as *counterbalance, counterchange, counterfeit, countermand, countermarch, countermark, countermure, counterpoise, counterseal, countersign*, etc., and their derivatives; also in adaptations of later F. or Italian words in *contre-, contra-*; and in many words formed after them in English. *Counter* has thus become a living element of the language, capable of entering into new combinations even with words of Teutonic origin. It may be prefixed, when required, to almost any substantive expressing action, as *motion, counter-motion, current, counter-current*, or even to any word in which action or incidence is imputed, as *measure, counter-measure, poison, counter-poison.* Hence it is often viewed as an independent element, written separately, and practically treated as an adjective: see COUNTER *a.*

In those compounds which we have taken from French or Italian, the consolidation of the word is usually greater than in those formed in English, and they are regularly written as single words, as *counterbalance, counterfeit, countermand, countermarch*, though sometimes with the hyphen. The stress is normally, in verbs and their derivatives, on the root, in nouns and their derivatives, on the prefix: cf. to *undergo*, *undertone*. But there are exceptions, esp. where the noun stress is taken by a verb of the same form, as in *to counterfeit*. In words formed in English the two elements are in looser union, both accentually and in writing. In verbs the rhetorical or antithetical stress on the prefix may be equal to, or even for the nonce stronger than, that normally on the root, as in *to plan and counter-plan* (*counter-plain*), and the two parts are properly hyphened. In nouns, when the *counter-* word is contrasted explicitly or implicitly with the simple word (as in 3, 4, 5), the predominant stress of the prefix is strongly marked, as in *counter-cheer, counter-announcement*. These are properly written with the hyphen (now rarely as a single word, but occasionally in two separate words). When such a contrast is not distinctly present (as in 6, 9), the predominance of the prefix is less marked, and the root-element may receive an equal or greater stress; in such case there is a growing tendency to write the prefix as a separate qualifying word, and in fact to treat it as an adjective. Thus *counter-side, counter-truth*, become *counter side, counter truth*: see COUNTER *a.*

All permanent compounds in *counter-*, with some of the more important of the looser combinations, are given in their alphabetical order; of the casual combinations (many of them nonce-words) of obvious meaning, examples here follow.

I. 1. *verbs*, as COUNTERACT, COUNTER-MAKE, COUNTER-SAY, COUNTERWEIGH, COUNTER-WORK, with their derivatives: which see in their alphabetic places. Also many nonce-words, either contextual, or framed as literal equivalents of French or Italian verbs in *contre-, contra-*, expressing the doing of a thing or performance of an action in the opposite direction or sense, with a contrary effect, or in opposition, retort, or response to the action expressed by the simple verb; sometimes with the notion of rivalling or outdoing, checking or frustrating that action; sometimes merely in reciprocation. Such verbs were formerly more frequently formed and used than now. Examples: *counter-address, counter-advise, counter-affirm, counter-ambush, counter-avouch, counter-beat, counter-bid, counter-bore, counter-cross, counter-dance, counter-dig, counter-fix, counter-gird, counter-judge, counter-lock, counter-meet, counter-petition, counter-plan, counter-please, counter-post, counter-pray, counter-preach, counter-prick, counter-refer, counter-ruin, counter-shine, counter-state, counter-swear, counter-thwart, counter-traverse, counter-tug, counter-vote.* A rare sense in English is that of 'across, cross-', as in *counter-dash, counter-strike*; COUNTER-BAR, -HATCH. (These are hyphened, but were formerly often written entire. The main stress is on the verb.)
